HBRC - FIRE LAB

FIRE SAFETY FORUM

منتدى السلامة من الحريق

AN OUTLOOK OF

GLOBAL FIREPROOFING POLICIES,

RECENT ADVANCES AND FUTURE CHALLENGES

نظرة على السياسات العامة لمقاومة الحريق،
التطورات الحديثة والتحديات المستقبلية

25 October 2021

Venue : The venue of the forum is at HBRC
87 El-Tahrir ,Dokki,Giza,Egypt

Exhibition : An exhibition will be held at the HBRC
premises during 24-28 October , 2021

Ministry of Housing, Utilities and
Urban Communities

Fireproofing industry witnessed rapid development as response to several global policies. The industry had to accommodate several changes in designs, operation, standards, and practices to meet the targets of phase-down of fire hazards to improve building efficiency, reduce generated exhaust gases, and consider non-conventional solutions i.e., reactive and passive fire protection options.

Based on the urban development plans that witnessing in accordance with Egypt's Vision 2030, and the link between the development goals using fireproofing systems in integration with firefighting systems.

This forum intends to shed light on the dynamics of global policies of Fireproofing works. HBRC-Fire lab collaborates with key industry leaders for organizing the fire safety forum. This is the first joint event to highlight the recent developments in fire resistant and fire stop materials and assemblies for improving fire and life safety in buildings. This scientific event is specially planned for Building Owners, Municipality Officials, Civil Defense, Architects/ Engineers and Fireproofing Contractors. The trends to be covered/discussed in this forum will include but not limited to: precast lightweight partitions, light steel framed walls, fire resistant door assemblies, fire resistant joint assemblies, fireproofing intumescent paints, cementitious fireproofing coats, fire retardant aluminum cladding, fire resistance ceiling and fire resistant raised floors...etc.

This forum is focused to bring together all parties to the fire-resistant business systems to discuss all that is new in light of what is related to the safety of the occupants and the structure.
